Art Unit: 1614

Restriction to one of the following invention is required under 35 U.S.C. 121.

Group I: Claims 1-8 and 24 drawn to a method of promoting a wild – type activity in a mutant form of a human protein of the p. 53 family employing compound of formulas I, II, III, IV or V wherein A and B is carbon or nitrogen. The I, II, III, IV and V formulas are different heterocyclic compounds.

Group II: Claims 9-23 and 25 drawn to treating a disease such as cancer in a human subject employing a compound of formulas I, II, III, IV or V wherein A and B is carbon or nitrogen. The I, II, III, IV and V formulas are different heterocyclic compounds.

If applicants elect Group I, or II, they use further required to elect a single heterocyclic core structure.

The several inventions above are independent and distinct, each from the other, as they have acquired a separate status in the art of treating cancer as a separate subject matter for inventive effect and require independent searches. It is noted that a reference to one heterocyclic compound would not be a reference to another heterocyclic compound under 35 U.S.C. 103. Further, the claims read on a multitude of heterocyclic compounds, which would require many field of searches that would be an undue burden on the Examiner. Therefore, restriction for examination purposes is proper.

Applicants are required to make a provisional election even though this requirement is traversed.
